Summary

Software Engineer specializing in Java Full Stack development, specializing in Java, Spring Boot, REST APIs, PostgreSQL, and React.js. Experienced in building scalable enterprise applications, backend optimization, Microservices, Kafka, Redis, and Spring AI.

Experience

dWise Healthcare IT Solutions PVT LTD.

Aug 2025 – Present

Software Engineer

Bengaluru, KA

- Working on an enterprise healthcare platform for hospital management and EHR workflows.
- Developing and maintaining scalable backend applications using Java, Spring Boot, and REST APIs for healthcare enterprise solutions.
- Designed and implemented backend modules using Java and Spring Boot, managing deployment, maintenance, and performance optimization across production environments
- Optimized 50+ PostgreSQL queries using indexing, reducing page load time from 5s to 1.7s.
- Resolved critical production issues and optimized backend services, improving system reliability and user experience.

Pentagon Space

Jun 2024 – Jul 2025

Java Full Stack Developer Intern

- Developed full-stack applications using Spring Boot (Backend) and React (Frontend), improving UI responsiveness by 25%
- Implemented CRUD operations and optimized database interactions for better performance.

Pixel Softek

May 2023 – May 2024

Trainee Engineer

- Completed an apprenticeship focused on **Java development and software engineering fundamentals**, gaining hands-on experience with Java-based application development.
- Developed and maintained application components using **Java, SQL, and object-oriented programming concepts** as part of assigned projects and training activities.

Projects

FULL STACK APPLICATION - AI AGENT | Java, Spring Boot, ReactJs, PostgreSQL

- Developing an Agentic AI platform using Java 21, Spring Boot 3, and Spring AI to automate multi-step workflows through intelligent tool orchestration.
- Designing a scalable microservices architecture with API Gateway, JWT authentication, Kafka, PostgreSQL, and Redis.
- Implementing LLM-powered tool calling to integrate services such as Email, SQL, Jira, Slack, and Calendar using natural language requests.

Music Library | Java, Spring Boot, Spring Data JPA, MySQL

Github

- Developed RESTful APIs for music catalog and playlist management.
- Implemented JWT authentication and role-based authorization.
- Optimized database queries achieving average response times below 50ms

Certifications

Java Full Stack Certification – Pentagon Space

Technical Skills

Programming Languages: Java, JavaScript (ES6+), SQL, HTML/CSS

Frameworks & Libraries: Spring Boot, Spring Data JPA, Hibernate, React, Spring Security

Databases: PostgreSQL, Redis

DevOps & Tools: Git, Maven, Docker, Kafka, Postman, GitHub

Core Concepts: REST APIs, Microservices, JWT Authentication, OOP, DSA, Design Patterns, Agile/Scrum

AI Technologies: Spring AI, LLM Tool Calling, Agentic AI

Education

Visvesvaraya Technological University

Jul 2018 – Aug 2022

Bachelor of Engineering (ECE)

Bengaluru, Karnataka

- RNS Institute Of Technology
